

Mid Range PIR Presence Detector

This is a mid-range microwave presence/absence detector for the automatic control of lighting, heating and ventilation.

This detector has a low profile design which allows flush mounting into a ceiling tile, or surface mounting using a detector back box. Its reduced head size makes it unobtrusive to occupants. This detects movement using a highly sensitive microwave detector.

The simple plug in connections reduce installation time. The optional infrared remote handset allows the user to override the set up.

All functionality is fully programmable.

PRM Switching Detectors

Key features include:

- Presence detection and switching with lux level sensing
- Absence detection functionality
- User handset available to control on/off and lux levels
- Time delay function
- Programmable via our programming handset

Direct Dim Dimming Detectors

Key features in addition to PRM include:

- Dimming functionality
- Step-down illuminance
- Maintained Illuminance (daylight linking or daylight harvesting)
- Digital detectors can control up to 20 dimming ballasts
- User handset available to control on/off, lux levels and preset scenes
- Two channel flexibility
- Scene setting and recall
- Lamp burn-in
- Suitable for all lighting types

Mid Range PIR Presence Detector

Available options

Direct Dim Dimming Detectors	Low profile microwave presence/absence detector with Direct Dim (DALI/DSI) and time delay function, Low profile microwave presence/absence detector with Direct Dim (1-10V) and time delay function
PRM Switching Detector	Standard, Low profile microwave presence/absence detector, lux level sensing, infrared override and time delay

Product Code: PIR-MR
